

LIBRARY

The library at Sacred Heart High School is a dynamic, exciting, multi-functional space that combines academic pursuits with a love of reading in a variety of ways. It is a space for learning, where library lessons take place; a study area; a hub of extra-curricular activities and a spot for quiet reading and discovery. With this in mind, the librarian oversees an integral part of the school and one that encompasses a wide range of our values all in one place.

Many lunch time and after school activities take place within the library, from book and creative writing clubs to manga and study club. The library hosts a wide programme of events that take place throughout the year: welcoming authors, taking part in local book awards and celebrating national events such as World Book Day and Harry Potter Book Night. This programme continues to expand, with plans for a whole school festival of reading to take place later this year.

The library is a welcoming, lively and very popular area of the school, attracting regular visitors from across the year groups. The librarian at Sacred Heart plays an important role in our whole school mission to encourage reading for pleasure as well as working closely with the English department to inspire students and improve literacy.
