## Subject Leader of Science Application Pack

The Science Department at Dene are dedicated to delivering a supportive, exciting and engaging curriculum, which is designed to provide both challenge and support for all students. Our six fully fitted science labs enable us to develop the lab skills of our students and bring 'working scientifically' to the forefront of our day to day teaching. We aim for our students to feel part of a community, allowing them to grow in confidence and share a sense of pride in their achievements.

We are looking to appoint a dedicated, inspirational and outstanding teacher to undertake the role of Subject Leader. The successful candidate will share our community ethos and have an excellent knowledge of the curriculum.
