Performance and Information Manager

(Town Hall, South Shields)

£47,420

We are looking for someone to help us deliver against our priorities through our new, enhanced, corporate performance framework.

We'd love to hear from you if you are a positive, motivated, solutions focused team player with a strong background in using performance data to support improved outcomes and particularly if you have experience of data in Adult Social Care.

It's a great time to join us at South Tyneside Council.

You will work in a strong, supportive team, at a council that values performance data, managing a small team to provide data support and develop MS PowerBI reports and dashboards that help senior managers make data-driven decisions to ensure local people receive personalised and effective support to live better lives.

You will make a real difference by helping us make the best use of our performance data to provide oversight, assurance and challenge, supporting evidence-based decision-making by working with senior managers who will really value the support you provide.

You will have excellent analytical and IT skills and be able to present data in an effective and engaging way. You will provide excellent customer service across a range of services, including Council partnerships, and have the ability to maintain strong, productive relationships with key customers. This is a great opportunity for the right person to develop their career and networks in the world of local authority data.

We offer other fantastic benefits...flexible working hours, home and office working, generous holiday entitlement, an excellent pension scheme and much more!

For more information please contact David Wilkinson - Performance and Information Manager, david.wilkinson@southtyneside.gov.uk
